

Water Based Wax & Grease Remover

Removes wax, oil, grease, and other surface contaminants. Because the product is water based, it's ideal for working with plastics and reduces the build up of static electricity. You can also use the product as a gun cleaner for water based products. Excellent alternative to solvent based wax and grease removers as your final wipe before painting. Zero VOCs.

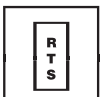

Part #	Description	Size
5911	Water Based Wax & Grease Remover	Quart

Substrates

- Use on all solid surfaces as a cleaning agent.

Mixing

- No reduction or catalization. Product packaged ready to use.

Application

Use before and after sanding operation of repair to remove wax, grease, oils, sanding dust and other surface contaminants. Apply liberal amount to surface either with a clean saturated cloth or pump sprayer. Wipe immediately with a clean dry cloth, wiping in one direction. Finish by removing excess wax and grease remover by re-wetting the surface with clean water and wiping dry with a clean cloth.

Physical Data

Color: Clear
 VOC: 0.0 lbs/gal

Master Tips

Water based Wax and Grease Remover is an excellent cleaning agent for all types of applications. Because it's water based, you can use it anywhere solvents or static is a concern. Excess product should be removed with water and a clean dry cloth. Don't try to completely dry the surface by wiping, excessive wiping will generate a static charge on the substrate. Let the last little bit of water not absorbed in your final wiping flash off the surface.
